Profile

Hard working, ambitious candidate with a determination to succeed. I am able to build a good working relationship with all levels of seniority, as well as being reliable, punctual and very presentable. I am self-motivated with a burning desire to learn at any opportunity and able to work as part of a team and equally well on my own.

I am now seeking a challenging role that will further test my technical expertise and teach me new skills in an interesting and motivating environment. I am also currently studying for an Ethical Certified Hacker certification.

Skills

- Live Broadcast Experience / Post Production

- SQL Server Support
- Clustered Storage
- Remote support for users and servers
- PC builds and upgrades
- Hardware support, desktops, servers, laptops and printers
- Cat 5 and Cat6 and fiber installation and support

Robert Gasior

Red Bee Media

September 2011 – Current

Currently I am at Red Bee Media as a Principal Engineer, which is the most senior specialist for an area. My areas of specialism predominantly relate to Storage Systems for TV Broadcasters. Both the traditional "channel", and the VOD side for companies. I specialise predominantly in Channel 4s channels (Channel4, E4, More4, Film4) and also support a variety of VOD clients including Channel4, Channel5, and ITV, along with a host of smaller providers including Orange, BT Vision, and Eircom. I work with a variety of areas mainly focusing around Ingest, Storage (Online and Tape), Media Management, Workflow, Editing, and Transcode systems.

I currently work with standard PC architecture for the servers running on Windows, and Linux (SUSE). SGI Storage, Quantum Tape Library working with FRONT PORCH DIVA and TSM, , Rhozet Carbon, and Agility Anystream transcoders.

I manage and support Stornext Isilon and Xsan Storage, working on various big data storage projects. I am also fully responsible for 50+ Edit suites running Final Cut and Creative Suite within an OD / AD environment.

Formula One Management

July 2009 – September 2011

My role at Formula One Management was Senior Digital Media Engineer, with this role I implemented an MXF file based working flow with Final Cut Server, Final Cut Studio, EVS Broadcast Software, Centos and Redhat Linux systems. My Role includes full responsibility for the the post production facility (of around 30 Mac's) work flow and technical support, with a heavy emphasis on support of clustered storage. I manage a small team managing and installing XSAN with a 100TB storage SAN and a further 250TB Isilon Clustered SAN and a 100 TB "travelling" stornext SAN. I have also worked on 3D and Red work flows travelling to races and working with various projects within the live production. I also hold full responsibility for the ingest of all media and QC of finished production media. I managed Digital Rapids / Episode Engine / Rhozet and Cerifcy transcoding and file based QC checking and movement of media with Aspera. I installed all clustered storage at Formula One Managements TV production I designed it and enabled a HD work flow to support the global nature of the buisness.

Walt Disney

August 2008 – July 2009

At Walt Disney I had the position of Senior Mac Support Analyst supporting all world wide Walt Disney Companies, supporting primarily all apple Macintosh and Linux computers within the companies. Also supporting SAP, Active Directory, Altiris (including building images), Vmware Server and Citrix. OSX 10.5 – 10.3 (Server and Client) Supporting a user base of 2000+ assisting users with applications such as Adobe CS2 – CS4 and all Microsoft Office applications. I also implemented an IPTV Solution and am fully responsible for support of Final Cut Client / Server, Avid and Autodesk 3d Studio. I was fully responsible for the installation and support of an 100TB XSAN

WWAV Rapp Collins

December 2006 – August 2008

I was working at WWAV Rapp Collins as an IT Support Analyst Supporting Mac and PC workstations and servers. I predominantly support Apple Mac, however I also support PC users and Windows Servers. Supporting over 500 users in the building dealing with various technical issues. I was fully responsible for maintaining network documentation and implementation of Remote Access Services.

Robert Gasior

- OSX client and server support 10.3 – 10.4
- Windows 2003 server support
- Linux Server Administration
- Altiris
- Open Directory and Active Directory Support
- Mac imaging and Net boot / Net serve
- EMC / Dell Storage
- VPN RSA Token
- Remote Access

I have a keen interest in computer networks, wireless Internet, Satellite, Cable, Terrestrial communications, Linux and Apple Macintosh Computers. I also enjoy spending family time with my young daughter and fiancé
